A Word from CIPL's President

Bojana Bellamy

President, Centre for Information Policy Leadership

“

I am so proud of what the CIPL team has achieved in the past year through our work on global privacy, data and digital policy, law and compliance. When I see many of the policy and practical ideas that we have been advocating over the past decade gain global acceptance, and when I witness CIPL member companies building, improving and leading on privacy and responsible data and technology governance programs, I know that we are making a real impact. The thought-leadership and best practices that we have been promoting and developing with our members are truly a catalyst for positive change. Our collective work has never been more rewarding and relevant at a time of the profound digital transformation.

”

Report | 10 January 2023 | Business Benefits of Investing in Data Privacy Management Programs

The report, produced in partnership with the Privacy Center of Excellence at Cisco, explored the business benefits and ROI of DPMPs. In particular, it demonstrated that organizations are experiencing a wide range of benefits from investing in DPMPs. These include risk management and compliance benefits, as well as positive benefits to use and leverage data more effectively and confidently for responsible innovation.

CIPL Submission to the Digital Regulation Cooperation Forum (DCRF) workplan 2023 to 2024: Call for input

I. Introduction

The Centre for Information Policy Leadership (CIPL) welcomes the opportunity to provide input to the Digital Regulation Cooperation Forum (DCRF) workplan 2023 to 2024 by answering to the questions presented in its call.

1. Are there policy interactions or technologies you would like the DCRF to take into consideration as it develops its workplan for 2023/24? Why are these important? Please outline areas that cover at least two of the DCRF member regulators' remit.

Digital Assets in blockchain

Digital assets in blockchain are transforming financial services, both traditional and new, and are taking a foothold in many forms in the an expanding digital economy. As financial services regulators seek to put their arms around this fast evolving area in the US, UK, EU and other jurisdictions, it is imperative that data privacy issues are considered and addressed in tandem with the development of financial services policy and regulation to ensure a coherent, comprehensive and workable regulatory approach, and to support an open, innovative and competitive market in the UK. This interplay is particularly important for the ecosystem in blockchain networks given the foundational role of privacy in establishing and maintaining "trust" in the myriad of financial services innovations being developed. The key elements of blockchain - transparency, immutability, borderless and de-centralised infrastructure - challenge many core concepts of privacy. This needs to be urgently addressed to enable users, providers and the technology and innovation supporting digital assets to continue to innovate with certainty, and to ensure that the UK attracts both talent and investment to be a market leading in digital assets and crypto.

CIPL's Response to NTIA Privacy, Equity, and Civil Rights Request for Comment

Docket No. NTIA-2023-0001
Submitted March 6, 2023

I. EXECUTIVE SUMMARY AND KEY RECOMMENDATIONS

The Centre for Information Policy Leadership (CIPL) welcomes the opportunity to comment on issues at the intersection of privacy, equity, and civil rights as the National Telecommunications and Information Administration (NTIA) gathers information to prepare a report on whether and how commercial data practices can lead to disparate impacts and outcomes for marginalized or disadvantaged communities.

As reflected by the NTIA in its first question—"to 'privacy' the right term for discussing these issues?"—CIPL views the civil rights implications of commercial data practices as questions focusing more on data use than on data privacy. Although privacy concerns are certainly related to data uses, the questions raised are more accurately characterized as ones addressing responsible data practices. CIPL has a long history of promoting responsible data practices through its efforts regarding organizational accountability. Indeed, CIPL's Accountability Framework,² at its core, is a blueprint for responsible data practices. By encouraging organizations to implement and demonstrate accountability, CIPL has sought to ensure not only that organizations comply with applicable legal requirements and best practices but also that organizations improve societal trust in their legitimate and beneficial uses of data.

Figure 1. The CIPL Accountability Framework

RESPONSE BY THE CENTRE FOR INFORMATION POLICY LEADERSHIP TO THE CCPA'S INVITATION FOR PRELIMINARY COMMENTS ON PROPOSED RULEMAKING ON CYBERSECURITY AUDITS, RISK ASSESSMENTS, AND AUTOMATED DECISIONMAKING

March 27, 2023

I. INTRODUCTION AND KEY CONSIDERATIONS

The Centre for Information Policy Leadership (CIPL) welcomes the opportunity to submit comments in response to the California Privacy Protection Agency (CPPA) or the Agency's invitation for preliminary comments on proposed rulemaking on cybersecurity audits, risk assessments, and automated decisionmaking. CIPL is a global privacy and data policy think tank that works with industry leaders from over 85 members and project participants, regulatory authorities, and policymakers to develop global solutions and best practices for privacy and the responsible use of data.¹ This response focuses on risk assessments and automated decisionmaking (ADM). We use CCPA to refer to the California Consumer Protection Act as amended by the California Privacy Rights Act.

CIPL has a long history of promoting responsible data practices through its efforts regarding organizational accountability. When paired with clear guidance from regulators, organizational accountability supports businesses in achieving effective risk assessments and responsible decisions regarding data uses, including automatic decisionmaking.

Regarding risk assessments, CIPL offers the following considerations:

- Regulations or regulatory guidance should set forth the specific harms that should be identified and considered in a risk assessment.
- Prescriptive lists of scenarios, technologies or processing activities that are considered a "significant risk" should be avoided.
- Instead, it would be helpful to provide non-exhaustive lists describing 1) the kinds of high-risk processing operations that may require more detailed and robust risk assessments or data protection impact assessments and 2) the kinds of low-risk processing that likely do not.
- Risk mitigation does not mean the elimination of risk, but the reduction of risk to the greatest reasonable extent, given the desired benefits and reasonable economic and technological parameters. Regulations should help businesses make reasoned and evidence-based decisions on whether to proceed with processing in light of any residual

Public Consultation | 14 October 2023 | CIPL Commented on the ANPD Draft Regulations for International Data Transfers

CIPL encouraged the ANPD to participate in the Global CBPR system, as well as the companion certification for processors, the Global PRP system, in reliance on arts. 33(II)(d), 35 and 36 of Brazil's General Data Protection Law (LGPD). The response encouraged the ANPD to recognize the validity of certifications and other approval-based transfer mechanisms that organizations have received from other jurisdictions that offer the same level of protection as the LGPD.

[ACCESS](#)

Data Sharing Between Public and Private Sectors When Local Governments Seek Information from the Sharing Economy

White Paper | October 2023

CIPL Comments to ANPD Draft Regulations for International Data Transfers

Submitted 14 October 2023

The Centre for Information Policy Leadership (CIPL) welcomes the opportunity to comment on ANPD's draft regulations on international data transfers. On June 29, 2022, CIPL filed a Response to ANPD's Request for Comments on the Regulation of International Data Transfers,¹ and CIPL incorporates by reference the comments previously submitted.

In particular, CIPL wishes to highlight and further encourage ANPD to participate in the Global Cross Border Privacy Rules (Global CBPR) system, as well as the companion certification for processors, the Global Privacy Recognition for Processors (Global PRP) system, in reliance on arts. 33(II)(d), 35 and 36 of Brazil's General Data Protection Law (LGPD). As noted in our earlier filing, the Global CBPR Forum² is in the process of transitioning the current APEC CBPR and PRP into Global CBPR and PRP, which would enable non-APEC countries like Brazil to participate in the systems. This past summer, the Global CBPR Forum granted Associate Status to the United Kingdom, the first non-APEC jurisdiction to express an interest in the systems.³ The Global CBPR and PRP systems seek to advance a multilateral and comprehensive solution to accountable, trusted, and efficient data flows.

Participation in the Global CBPR and PRP systems will have an added benefit of lessening the burden on resource-limited regulators like ANPD because front-line oversight and compliance are handled by third-party certification bodies, known as accountability agents. Ultimate enforceability, however, would remain with ANPD and the other global data protection authorities that participate in the systems.

Similarly, we encourage ANPD to recognize the validity of certifications and other approval-based transfer mechanisms that organizations have received from other jurisdictions that offer the same level of protection as the LGPD, as they indicate that a robust regulatory review of processes and controls has taken place. This would enable organizations that already work with those transfer mechanisms to use them in Brazil as well, which would increase efficiency and reduce compliance costs.

20 October 2023

CIPL Response to ICO Consultation on Draft Guidance on Biometric Data

On 18 August 2023, the UK Information Commissioner's Office ("ICO") issued its draft Guidance on Biometric Data ("Guidance").¹ The ICO invited the public to submit comments by 20 October 2023. The Centre for Information Policy Leadership ("CIPL") supports the ICO's desire to explain how data protection law applies to biometric data in biometric recognition systems, and CIPL welcomes the opportunity to submit the following comments.

Please note that CIPL is currently preparing a white paper, provisionally titled "Enabling Beneficial and Safe Uses of Biometrics through Risk-Based Regulations," to be published before the end of the year. The forthcoming white paper examines various applications of biometric technologies and their associated risks and benefits, analyses the current legal landscape and trends for regulating these technologies, and urges the adoption of a risk-based approach for potential regulation and guidance. The white paper also recommends the development of a consistent and appropriate legal definition for covered biometrics. CIPL will share this document with the ICO upon its completion and public release.

1. General Comments

- **Regulations should be based on risk** – It is important to embrace a risk-based approach in biometric data laws and regulations to help assess when, where, how, and whether the use of biometric data is appropriate in a given circumstance. A risk-based approach ensures that low-risk applications can be deployed without undue restraints, that higher or high-risk applications are deployed with appropriate protections and mitigation measures, and that substantial regulatory hurdles or complete bans are reserved only for high-risk uses where effective safeguards are not available. This approach will avoid both overregulating and underregulating biometric technologies (such as facial recognition technology, which can be applied in both high- and low-risk situations).

- **Terminology & definitions** – CIPL largely commends the ICO's proposed definition of "biometric data," for it avoids common mischaracterizations of biometric data as encompassing all data about the body or as always falling within a special category of personal data. In particular, CIPL supports the ICO's effort to clarify "biometric data" for purposes of Article 4(14) of the UK General Data Protection Regulation ("UK GDPR") by including a list of illustrative practical examples. That said, one aspect of the definition—*viz.*, that covered data "allow or confirm" the unique identification of an individual—will require further clarification. The meaning and scope of "allow" is unduly broad and insufficient for organisations that must determine whether certain data is covered. As noted above, CIPL is currently working on a white paper on biometrics, which will address the issues raised by the "allow or confirm"

¹ ICO Consultation on the draft Guidance on biometric data, available [here](https://ico.org.uk/consult/standard/2023/08/18/biometric-data/).

² CIPL is a global privacy and data policy think tank in the law firm of Hurton Andrews Kurtj LLP and is financially supported by the law firm and over 500 member companies that are leaders in key sectors of the global economy. CIPL's mission is to engage in thought leadership and develop best practices that ensure both effective privacy protection and the responsible use of personal information in the modern information age. CIPL's work facilitates constructive engagement between business leaders, privacy and security professionals, regulators, and policymakers around the world. Nothing in this paper should be construed as representing the view of any individual CIPL member company or of the law firm of Hurton Andrews Kurtj LLP.

Op-Ed | 20 October 2023 | CIPL Responded to the ICO Consultation on Draft Guidance on Biometrics

The response to the draft Guidance on Biometric Data published by the Information Commissioner's Office supported the ICO's desire to explain how data protection law applies to biometric data in biometric recognition systems.

[ACCESS](#)

15 Steps to Accountable Data-Sharing Practices Between Public and Private Sectors

The Centre for Information Policy Leadership (CIPL) recommends the following accountability measures when local governments request private sector businesses to share data outside the context of law enforcement and national security matters. Data sharing in the business-to-government (B2G) context must respect individual privacy rights as well as businesses' legal obligations. These accountability measures will promote public trust and private sector support for B2G data-sharing requests.

CIPL Recommendations

1. **Clearly Define & Document Purpose**
The purpose limitation of privacy laws that limit the collection, use, and disclosure of personal information is foundational to privacy protection.
2. **Limit Collection & Use**
Limit government requests for data to what is necessary and proportional to the specific purpose.
3. **Identify Legal Basis**
Identify the legal basis for the request, which should be a specific legal basis for collecting data requested from the private sector.
4. **Recognize Individuals' Rights**
Recognize individuals' rights to access, correct, delete, and port their data, and to opt out of data sharing.
5. **Assess Risks and Impact**
Assess the privacy risks and potential harm to individuals from the request, and the impact on the privacy of all affected individuals.
6. **Facilitate Transparency**
Facilitate transparency by providing notice to individuals about the request, and the purpose, use, and disclosure of their data.
7. **Implement Robust Data Security**
Implement robust data security measures to protect the data from unauthorized access, use, and disclosure.
8. **Establish Data Retention & Deletion Protocols**
Establish data retention and deletion protocols to ensure that data is not kept longer than necessary for the purpose.
9. **Take Individuals for Notice & Representation**
Take individuals for notice and representation by providing a clear and concise notice of the request, and the purpose, use, and disclosure of their data.
10. **Engage in Meaningful Dialogue**
Engage in meaningful dialogue with the private sector to understand their perspective on the request, and to explore alternative solutions.
11. **Adopt Trust with Consensus & Accountability**
Adopt trust with consensus and accountability by establishing a clear and concise notice of the request, and the purpose, use, and disclosure of their data.
12. **Recognize Internal Oversight & External Validation Measures**
Recognize internal oversight and external validation measures to ensure that the request is compliant with the law, and that the data is used for the purpose.
13. **Promote Engagement with Regulators**
Promote engagement with regulators to ensure that the request is compliant with the law, and that the data is used for the purpose.
14. **Adopt Privacy by Design Principles**
Adopt privacy by design principles to ensure that the request is compliant with the law, and that the data is used for the purpose.
15. **Seek Multistakeholder Solutions**
Seek multistakeholder solutions to ensure that the request is compliant with the law, and that the data is used for the purpose.

Understanding the Role of Privacy Enhancing and Privacy Preserving Technologies (PETs and PPTs) in the Digital Age

December 2023

White Paper | 12 December 2023 | Privacy-Enhancing and Privacy-Preserving Technologies - Understanding the Role of PETs and PPTs in the Digital Age

This White Paper is a culmination of the Centre for Information Policy Leadership's year-long examination of research into, and interviews with businesses, experts and regulators on the state of the art of PETs and PPTs. We call on policy and lawmakers to understand the business drivers calling for the increased use of data and to proactively incentivize and support the creation and broader implementation of PETs and PPTs.

[ACCESS](#)

“Over the past year, CIPL has continued to engage with the complex questions surrounding data policy and privacy in an age of unprecedented digital innovation. Through white papers, consultation responses, specialist webinars, roundtable discussions, panels and keynotes and more, CIPL has continued to be a global thought leader in the field, shaping accountable, forward-thinking data policies and practices.”

**Markus Heyder**

Vice President and Senior Policy Counselor, CIPL

IV.

CIPL EVENTS

12 January 2023 | Business Benefits and ROI of Accountable Privacy Programs

This event included a presentation of CIPL and Cisco's study on the Business Benefits of Accountable Privacy Programs and a discussion with Privacy Culture, a leading privacy software company, to discuss how an organization can successfully embed privacy accountability into its corporate DNA.

25 January 2023 | PETs Project Update Call

This update call introduced our revised project plan which was based on the input we received from members and regulators since the introduction of the project. CIPL provided an overview over the specific project goals, methodology, and deliverables as well as immediate next steps.

9 February 2023 | CIPL Hosted an Event to Launch the Accountable AI Mapping Project

During the event, the CIPL team provided a detailed overview of the goals, methodology and deliverables of the project. The event provided an opportunity for CIPL members to ask questions and provide initial high-level input and perspectives relating to accountable AI and a number of specific questions. The input during the call was used to inform a detailed questionnaire that was circulated with project participants after the call.

CIPL EVENTS

16 February 2023 | CIPL Hosted a Roundtable on Age Assurance and Age Verification Tools

At this roundtable, CIPL gathered perspectives from regulators and industry on the methodologies used to shield minors from harmful or inappropriate content, satisfy legal compliance obligations, and promote age-appropriate content. Participants discussed risk-based approaches for choosing the most appropriate option for each use case, while recognizing the technical and legal limitations and challenges that remain in striving to be respectful of minors' rights.

9 March 2023 | CIPL Hosted a Roundtable on the Business Benefits and ROI of Accountable Privacy Programs

Leaders and experts from CIPL member companies gathered in London to share insights into how the implementation of privacy management programs has benefitted their business' bottom lines.

23 March 2023 | CIPL Hosted a joint Roundtable with Hunton Andrews Kurth on Children's Data

CIPL President Bojana Bellamy joined Hunton Andrews Kurth LLP Partner Sarah Pearce to lead a Perspectives on Privacy roundtable on Children's Data Policy. Global experts met to discuss the current children's data privacy landscape and key issues surrounding best practices and compliance.

CIPL EVENTS

3 April 2023 | CIPL Hosted a Workshop on Moving Beyond Data Localization: Enabling Trusted Cross-Border Data Flows

At the event, CIPL presented our discussion paper "The Real Life Harms of Data Localization Policies" alongside the second paper in the series, "Data Localization and Government Access to Data Stored Abroad" in collaboration with the team at the Tech, Law & Security Program. The workshop brought together experts to share insights and case studies relating to data localization and ways to secure trusted cross-border data transfers that will support innovation in the years to come.

20 April 2023 | CIPL Hosted an Event to Facilitate Conversations Amongst Key Stakeholders on Cross-Border Data Flows

The event brought together companies, regulators, government officials and civil society leaders to engage in constructive discussions about The Global CBPR Forum, global data flows and working together to support the important work ahead in ensuring safe data flows. The key message from conversations: there is hope for global data flows.

20 April 2023 | CIPL Hosted a Data and Boards Working Group Meeting

As CIPL's Data & Boards Project moved forward, we sought feedback from members of our Working Group on the first draft of our white paper: "Leveraging Data Responsibly: Why Boards and the C-Suite Need to Embrace a Holistic Data Strategy".

CIPL EVENTS

26 April 2023 | CIPL Hosted a Roundtable Titled The Digital Markets Act: Now What?

The roundtable centred on addressing unresolved questions related to the DMA's implementation, with a specific focus on data protection provisions. Some of the critical questions addressed by participants included: how we define data combination and cross-use of data under the DMA, and to what extent the DMA can limit the processing of personal data for that purpose; what the potential unintended consequences of limiting data combination and cross-data use under the DMA are; and how DMA consent relates to GDPR consent and who decides the scope of this going forward.

15 May 2023 | CIPL Hosted a Virtual Roundtable Titled Quo Vadis, CPO? An Evolving Role in Changing Times

CIPL members gathered to discuss how the role of Chief Privacy Officer is changing amidst the rapid acceleration in and adoption of generative AI and other AI tools. The discussion highlighted that AI is not a new consideration for many organizations, but the introduction and rapid adoption of easy-to-use, consumer-facing applications has caused many organizations to re-examine how they address AI governance and to elevate internal discussion on the topic; that internal education and upskilling on AI is an urgent priority; that responsible AI is an organization-wide responsibility and more.

24 May 2023 | CIPL Hosted a Roundtable on Zero Risk Fallacy: A Discussion on Foreign Governments' Access to Data, Data Localization and the Horizontal Reach of the Risk-Based Approach

Experts from Academia, data protection authorities and CIPL member companies met to discuss international data transfers and risk-based approaches as well as the findings of our paper co-authored by the Cross Border Data Forum and Professor Theodore Christakis.

CIPL EVENTS

1 June 2023 | CIPL Hosted a Virtual Roundtable on Data Sharing Between the Public and Private Sectors

The roundtable introduced CIPL's discussion paper on business-to-government (B2G) data sharing, entitled "Data Sharing Between Public and Private Sectors: When Local Governments Seek Information from the Sharing Economy". Participants explored ways for private sector organizations and local governments to foster the public trust and good corporate citizenship.

8 June 2023 | CIPL Hosted a Virtual Roundtable on U.S. State and Federal Privacy and Data Policies

CIPL members gathered to discuss U.S. privacy and data policies, and ways to continue fostering responsible and innovative uses of data in an era of rapid change.

22 June 2023 | CIPL Hosted a Roundtable on Age Assurance and Verification Amidst US Legislative Initiatives

CIPL hosted an online roundtable to facilitate an open discussion with members of CIPL's Children's Data Privacy Project. The roundtable provided members an opportunity to exchange practical observations and potential solutions related to the age verification provisions of newly enacted laws from Utah and Arkansas.

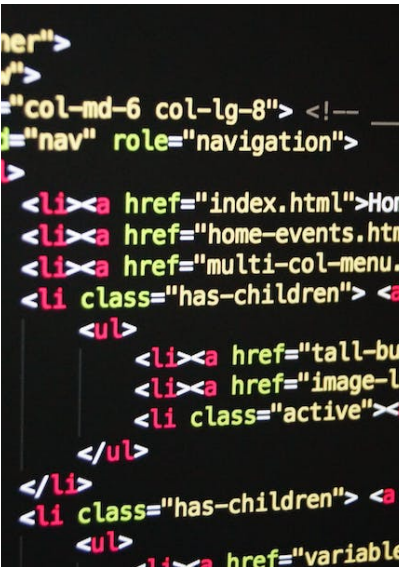

CIPL EVENTS

22 June 2023 | CIPL Hosted a Roundtable on Data Free Flows with Trust| How Global CBPR Can Serve as a Foundation for a New Multilateral Approach

In the discussion, key stakeholders and policymakers explored the CBPR System's ongoing transition to a global framework, considered its long-term potential for enabling a "one-stop-shop" for trusted global data transfers, examined existing synergies between GDPR and CBPR certifications, and identified other issues that are key to operationalizing any multilateral framework for trusted cross-border data flows.

29 June 2023 | CIPL Hosted a Webinar on Demystifying Generative AI

This session focused on demystifying generative AI, exploring how it differs from other AI tools and systems, and discussing how organizations can develop responsible practices surrounding its development, use, and application.

18 July 2023 | CIPL Hosted a Roundtable on Data Sharing Between the Public and Private Sectors

The roundtable brought together policymakers, public sector experts, academics and CIPL member organizations to discuss the findings of CIPL's discussion paper on "Data Sharing Between Public and Private Sectors: When Local Governments Seek Information from the Sharing Economy". At the roundtable, participants explored ways in which private sector organizations and governments can foster public trust and uphold good corporate citizenship.

CIPL EVENTS

23 July 2023 | CIPL Hosted a Workshop on the Best Interests of the Child: Convergence of Privacy, Safety, Security in Partnership with the PDPC

The first part of the workshop discussed the findings of CIPL's paper on Protecting Children's Privacy, how to understand and assess the best interests of the child bearing in mind multiple rights, interests and needs of children, how to deliver online safety while protecting children's privacy rights, how to provide age-appropriate design of services based on maturity and different stages of child development and more. The second part of the workshop examined various legal obligations in children's privacy and online safety across jurisdictions.

26 and 27 July 2023 | EU Age Appropriate Design Code

Following CIPL's selection as a member to the special group of experts for the European Commission's code of conduct on age appropriate design, CIPL organized two calls to discuss CIPL's thinking, next steps and any topics of interest in the context of the EU Code.

16 October 2023 | Exclusive Dinner at the Global Privacy Assembly - Building Trusted and Transparent Constructive Engagement

Participants discussed whether the traditional models of rule-making, compliance and enforcement are sufficient given the fast pace of technological change, whether we need more ongoing and real-time engagement on how existing rules apply to new technologies before violations occur, what the appropriate regulatory approach is to evolving tech and business practices and more.

CIPL EVENTS

18 October 2023 | GPA Side Event on Responsible AI in Practice: Risk Assessments, Responsibility of Different Parties and Transparency

This event explored a range of important questions associated with the responsible development and deployment of AI and consider concrete examples of current best practices and attempts to address the risks and challenges.

24 October 2023 | CIPL Hosted a Roundtable on Avenues Forward for Transatlantic Data Flows

The roundtable delved into the potential challenges for such an agreement and a potential course ahead. Speakers from academia, representatives from global organizations, policymakers, and regulators provided insight into the current landscape with practical examples and discussed what the impact of an agreement would mean for organizations, citizens and law enforcement.

31 October 2023 | CIPL Hosted a hybrid event on Responsible AI: Regulation and Industry Implementation

Panelists explored approaches to AI regulation and organizational governance in responsible development and deployment of AI, as well as examining tensions between establish data protection principles and sound AI policy. They discussed tools may be needed needed to decide which AI systems should be considered high risk or low risk, addressing "fairness" in AI, user education, the potential conflict between AI and privacy principles and much more.

CIPL EVENTS

14 November 2023 | CIPL Hosted a Roundtable on Responsible AI in Focus: Regulatory Developments and Emerging Best Practices

Participants explored the latest developments on the EU AI Act, how some long-established data protection principles may be in tension with AI, and concrete examples of current best practices to address risks and challenges.

27 November 2023 | CIPL Hosted a webinar on the City of London's Vision for Economic Growth Report

Members were able to hear from CIPL and the experts who contributed to the recently launched and ground breaking report by the City of London Corporation entitled, "Vision for Economic Growth - A Roadmap to Prosperity".

30 November 2023 | CIPL Hosted a Presentation for Members on Artificial Intelligence Regulation and Compliance in Brazil

Thiago Luís Sombra of Mattos Filho presented to CIPL Members on Artificial Intelligence Regulation and Compliance in Brazil: Emerging Trends and Challenges. The presentation highlighted key trends, challenges and developments in Brazil after the Federal Senate recently approved a new version of the Brazilian AI Legal Framework - Bill No. 2,338/2023.

CIPL EVENTS

1 December 2023 | CIPL Hosted a Side Event on Cracking the AI Code: Insights, Privacy, and Industry Outlook in Sydney

The first discussion was led by technologists and AI/data engineers from leading AI companies. It explored the inner workings of AI, including generative AI, the role of data in AI, how content is generated in generative AI, and how fine-tuning works and anticipated uses in business and consumer contexts. The second discussion gathered a group of data protection regulators will consider the impact of AI's explosive growth for data protection regulation and compliance.

11 December 2023 | CIPL Hosted a Webinar on Enabling Transformative Growth Through Generative AI

CIPL hosted an informative discussion on how legal teams, in partnership with CPOs, are enabling transformative growth through generative AI. This discussion showcased how generative AI is revolutionizing systems, sparking innovative ideas, streamlining supply chains, and enriching customer experiences. Speakers addressed how their legal teams work in sync with business operations to safeguard intellectual property, ensure privacy, uphold transparency, and propel growth.

13 December 2023 | CIPL Hosted a KnowledgeNet Event in Partnership with IAPP

As the APEC Cross-Border Privacy Rules and APEC Privacy Recognition for Processors transition to becoming a global framework for trusted data transfers, key stakeholders and policymakers gathered to learn about the status of this transition process and the long-term potential for Global CBPR and PRP to become a "one-stop-shop" for global data transfers.

“

This past year has really cemented CIPL's position as the avant-garde not just in privacy but more holistically in digital policy thought leadership, advancing responsible data use in an age of unparalleled innovation. We are working on so many important projects from children's privacy, to accountable AI, the opportunities of privacy preserving technologies and international data transfers. In Europe alone we are swimming on this veritable tsunami of new digital legislation and CIPL has published numerous thought-provoking whitepapers, consultations and articles that serve as resources for policymakers and industry leaders. What truly embodies CIPL to me though is our ability to build bridges. CIPL roundtables, webinars and engagements really bring forth the importance of engaging parties from across the digital ecosystem, and I am so proud of that. And I am also very proud to be a part of this really engaged, creative and passionate team we brought together!

”

ANNUAL EXECUTIVE RETREAT

Takeaways from the 2023 Annual Executive Retreat | Great Expectations: Meeting the Demands of Digital Ethics, Innovation, and Compliance in an Era of Rapid Technological Change

On 19-20 September 2023, the Centre for Information Policy Leadership (CIPL) hosted its Annual Executive Retreat in person at Hunton Andrews Kurth (HAK) in Washington, DC, with a virtual option available for CIPL members gathered in HAK's London office.

The day-and-a-half retreat featured keynotes, fireside chats, TED-style talks, panel discussions, and open Q&A on a host of legislative, regulatory, operational, and ethical issues regarding artificial intelligence, especially generative AI. The discussion also touched upon the current state of affairs and outlook regarding cross-border data flows. Conversations among participants continued at networking breaks, capped by an evening of cocktails and dinner at a nearby restaurant for DC attendees.

The organic discussions offered a broad range of insights, and CIPL sent Members a document highlighting key takeaways to summarize core points for members who were unable to attend this year's event.

PANELS AND KEYNOTES

Over 60 panels and keynote addresses

The CIPL team has presented around the world on key themes from our workstreams, from AI and PETs, to cross-border data flows, children's privacy and more. CIPL has remained a leading voice in the field, shaping the conversation around data protection around the world.

“ This has been an exciting year of progress at CIPL on longstanding workstreams as well as new ones. Our expanded team in DC is deepening CIPL's engagement with U.S. stakeholders on responsible privacy and data policy; our teams in the UK and EU have continued to do the same in those jurisdictions; and we've worked together to make an impact in policy discussions in Asia, Latin America, the Middle East, and international forums like the G7. Globally, we have been researching, writing, and convening experts to discuss privacy-enhancing technologies (PETs), accountable governance for artificial intelligence (AI), biometrics, cross-border data flows, the sharing economy, and children's privacy and online safety, just to name a few topics. We are looking forward to making progress across these and other topics central to responsible data policy and governance in the year ahead.
