The Ins and Outs of the APEC Cross-Border Privacy Rules (CBPR) and their Role in Enabling Legal Compliance and International Data Transfers

A Workshop for Controllers, Processors and Regulators in the Asia-Pacific Region

29 August 2015
Cebu City, Philippines
Three Simple Takeaways from this workshop:

- Understanding the numerous ways in which APEC CBPR can benefit your organization (information controllers)

- Understanding the numerous ways in which APEC PRP can benefit your organization (information processors and controllers)

- Understanding how and why to become CBPR certified (and PRP approved once the PRP system is operational)
• What are the CBPR and how do they work?

• Why did APEC develop the CBPR?

• What is the status of implementing them in the APEC region and what is the trajectory for expansion?

• The CBPR are for the APEC region. Are there any prospects for creating a CBPR system with global reach?

• What is the APEC Privacy Recognition for Processors (PRP) and how will it work?
Why did we seek CBPR certification?

What are the short-term and long-term benefits to businesses?

What was the certification process like?
   – What do businesses have to do to become certified?
   – How long does it take?

How does CBPR-certification correspond to approval under the EU Binding Corporate Rules (BCR)?
Certification schemes such as the CBPR help Privacy Enforcement Authorities and companies because:

- “Front line enforcement” and complaint handling by the Accountability Agents – in many cases, PEA involvement may not be needed

- Streamlining of investigations due to existence of a comprehensive privacy management program (CBPR)

- Participation in CBPR may be considered favorably by enforcement agencies when deciding whether to bring enforcement actions
